- "India's TAJ MAHAL will make news... Surrounded by much sadness, much grief...perhaps fire—perhaps war!" (To wit: first predicted in *STARGAZER: Predictions & Prophecies*, 2006; P.S.—in India, the next terrorist attack will be against the original Taj Mahal!)

For years I prophesied that cell phones cause cancer! Now, more and more studies seem to carry the argument. A new and safer method of portable communication is necessary, either mental telepathy or a return to the old tried and true mode of "two tin cans and a piece of string."

N.E. | MDs weigh legal euthanasia

The Quebec College of Physicians is considering endorsing euthanasia in particular circumstances, with a final proposal to be tabled this November, according to the *Globe and Mail*. The college said it hopes the recommendation would spark public debate and pressure the federal government to amend the criminal code prohibiting doctors from administering medications to terminally ill patients at levels that are required to alleviate pain but which can also be fatal. "The question here is to decide whether a drop in dosage or an increase in dosage constitutes a criminal act," the College's general secretary, Dr. Yves Robert, told the *Globe*.

N.E. | Breast cancer testing to restart

Newfoundland and Labrador is set to resume breast cancer testing again this fall, following the controversial findings of an inquiry last year that revealed 425 patients were given botched ER/PR hormone receptor test results between 1997 and 2005. As a result of the scandal, more than 60 recommendations about the way the tests are done have been made. Meanwhile, as part of a cabinet shuffle, provincial health minister Ross Wiseman has been demoted to a more junior cabinet position in an attempt to rebuild public confidence, according to the *Canadian Press*.

These included "The world's first full face transplant." Conrad Black's U.S. indictment for fraud, Sylvester Stallone's making yet another Rocky and Rambo movie, Barbara Streisand's abandoning retirement to tour once more; movie "Cinderella Man," the box-office bomb, being re-released in select theatres which will eventually become a cult favorite, the completely unexpected earthquake that shook Barrie, Ontario, Canada (virtually an earthquake-free zone!) and that a newly elected Party Quebecois leader (Andre Boicclair) would rise up through the ranks to drag Canada through the "Separation" mire again.

I hope you enjoy this book and thank you for purchasing it.

"The Man Who Predicted 9/11"

Under the guise of scientific investigation, CSICOP states that, "If psychics can see the future, why then don't they warn the world of impending disasters, such as 9/11?" To which my rejoinder is always: "We do, and did—in all the major newspapers—but nobody listened. And they never will. Because even that (*to not listen*) is also already fated!"

The future is carved in stone—including WW III!—and nothing but *nothing* can be done to change, alter or prevent it except perhaps the intervention of the Star-travelers / God / *Yahweh*—whatever! Only when they return will the world be at peace.... So, if it's true that "it would be nerve-wracking to know the future for certain"—well, let me say this—they're right! It is! I know, because I live it every day!... Che sera, sera.

The free world must contend with North Korea and then by extension, Red China! Sooner rather than later, when they are more deadly!

OSAMA BIN LADEN, or more probably his remains, will be brought to the U.S. to be tried for the worst war crime in the history of the world! Hanged, drawn-and-quartered, beheaded, disemboweled—after which a suitable punishment will then be considered.

Aspartame, the substitute sweetener, to be officially removed from the marketplace by the F.D.A. as a carcinogen.

But alas, great America has "lost face" in the eyes of the world, through bad judgment, yet in time shall regain it when her new government becomes stabilized.
