

25 YEARS AFTER ROCKY ...

Secrets of Sly's palm

IT'S a quarter of a century since Sylvester Stallone played an underdog boxer named Rocky Balboa and became a hero to millions of moviegoers.

And famed palm reader Anthony Carr says that Rocky star and creator Sylvester Stallone's similar rise from rags to riches is obvious by the fate written in the palms of his burly hands!

Psychic Carr did an in-depth reading for Stallone, 55, and his wife Jennifer,

33, during a visit to the superstar's sprawling \$10 million estate in a secluded area of Beverly Hills.

And Carr reports that Stallone's glory days are still to come, with the movie hero poised to become a real-life leader.

"Sly's fate line, the line that runs from the heel of the palm and goes straight up to the fingers, shows he's destined to be a hero," Carr explains.

"He's going to make a major re-emergence on the national scene as a hero figure, almost like Rocky or Rambo, and become a symbol of America's resolve to win the war on terrorism."

Carr also notes that Stallone's heart line, which goes from left to right across the top of the palm, has little influence lines indicating that the star was destined to find lasting love later in life.

That's exactly what happened when twice-divorced Sly flipped for the ex-model when he was approaching the big 5-0. He and Jennifer married in 1997 and have two kids - Sophia Rose, 5, and Sistine Rose, 3.

And the revelations Carr gathered from Jennifer's palm blew her normally laid-back hubby away!

"The minute I looked at Jennifer's hand, I could see the new baby they're going to have," says Carr.

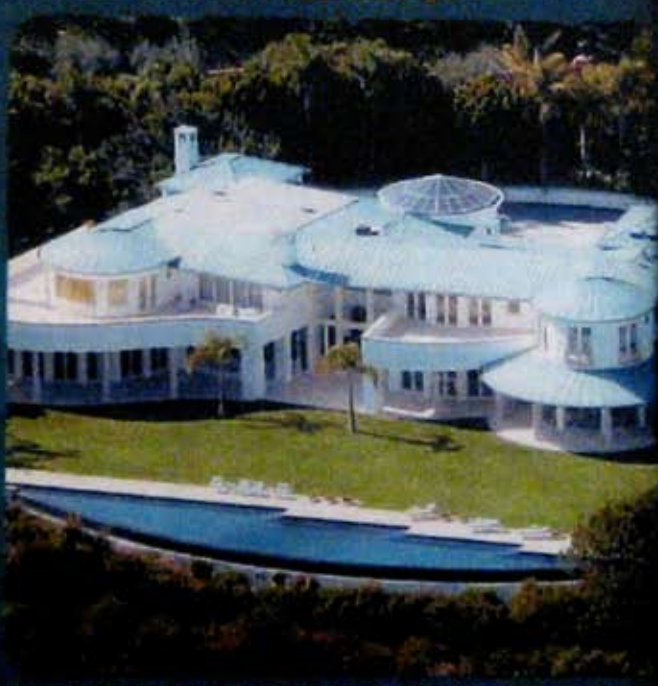

"I said: 'It's going to be a boy. A healthy, strong baby boy. He'll be very artistic and musically talented.'"

"Sly's face broke into this great big grin and he said he couldn't wait to see if I was right about that. I told him he would soon find out that I was!"

The first part of Carr's prediction was right on the money - Sly and Jennifer recently announced that they are expecting another child.

PLUS: Star goes inside his L.A. mansion

WHERE THE HEART IS: Sly's \$10 million Beverly Hills estate is an Italian-style villa, renovated to resemble country homes in Tuscany. Sly and his wife Jennifer expanded the home to an estimated 20,000 square feet, adding a library, garages and four bedrooms, for a total of nine sleeping chambers.

HEAVEN'S GATE: An ornate bronze entrance (above) greets guests before they are invited in to nestle by the fireplace (right) or admire Sly's collection of classical art, some of which hangs in the living room (below).
